PROFILE

Senior .NET Developer with 8+ years building backend systems across fintech and enterprise SaaS. Progressed from .NET Developer to Domain Lead for Rebtel's Payment Backend, architecting distributed, event-driven systems and end-to-end payment integrations. Strong background in .NET Core, cloud (Azure, Kubernetes), and domain-driven design, with a track record of evaluating technical trade-offs, driving architectural consensus across stakeholders, and raising team-wide code quality and test coverage.

EXPERIENCE

Domain Lead, Payment Backend · *Rebtel* Jan 2026 – Present

- Own architecture and delivery for Rebtel's payment backend as Domain Lead, spanning top-up, eSIM, and calling payments; currently designing pay-with-cash support for US customers via InComm with domain-driven design, applying SOLID principles throughout implementation.
- Participated in the Adyen and Braintree integrations, including Braintree vaulting for saved payment methods, and in shipping Apple Pay/Google Pay support, improving customer authorization and payment success rates.
- Redesigned ledger and accounting systems to support "Rebtel Credits" as a native payment method.
- Helped with and participated in the migration of the deployment pipeline from Helm/Azure to GitOps (GitHub Actions and ArgoCD); built an in-cluster HTTP interceptor to mock flaky third-party providers in dev/stage, improving deployment reliability and speed.
- Built AI-assisted engineering workflows (Claude) and an internal MCP server encoding team coding standards, raising code quality and test coverage.

.NET Developer → Sr. .NET Developer · *Rebtel, Wireless (eSIM) & Calling* Sep 2024 – Jan 2026

- Built Rebtel Wireless (eSIM product) integrating with Gigs for provisioning; designed the lifecycle state machine and subscription engine with domain-driven design, applying SOLID principles throughout implementation.
- Helped migrate the calling product from .NET Framework 4.8 to .NET Core, delivering part of the migration while continuing to ship new features.
- Promoted to Senior .NET Developer (Jan 2026).

.NET Developer · *Rebtel, MTU Marketplace* Dec 2023 – Sep 2024

– Helped integrate and maintain third-party mobile top-up providers (Ding, DT One, Zendit), and refactored them into a reusable onboarding workflow, cutting integration time from ~1.5 months to ~2 weeks.

.NET Developer · *Rebtel, Money Transfer* Jun 2023 – Dec 2023

– Maintained Rebtel's money transfer product with Ria (.NET Core, SQL Server, MongoDB, RabbitMQ) and continued building new features on it; built an Angular support tool for transaction troubleshooting.

Senior Software Engineer · *Infor Nexus* Jan 2020 – May 2023

– Delivered across three teams: mobile (Ionic/Angular), desktop (C#/VSTO Excel add-in), and backend (Java API), including a VSTO threading/performance fix at 10,000+ record scale.

– Promoted to Senior Software Engineer (Jan 2022).

Associate Software Engineer · *Scienter Technologies* Jun 2018 – Jan 2020

– Rebuilt a legacy ERP system (.NET Core and Angular) across master data, product management, invoice, and BOQ modules.

TECHNICAL SKILLS

Backend	C#, .NET Core/8, ASP.NET Core, Entity Framework Core, Web API
Architecture	Microservices, event-driven design, state machines, Design Patterns, SOLID, Domain-Driven Design (DDD)
Cloud & DevOps	Azure, AKS (Kubernetes), Docker, GitHub Actions, ArgoCD (GitOps), CI/CD
Data & Messaging	SQL Server, PostgreSQL, MongoDB, RabbitMQ
Payments	Adyen, Worldline, Apple Pay, Google Pay, InComm, ledger & accounting systems
Frontend & Mobile	Angular, TypeScript, JavaScript, Ionic, Flutter
AI-Assisted Engineering	Claude, MCP server development, AI-driven code review & test automation
Tools	Visual Studio, VS Code, Git

EDUCATION

B.Sc (Hons) in Computer Science Jan 2015 – Dec 2018

General Sir John Kotelawala Defence University | GPA 3.4
